DETAILED ACTION

1. Amendments to the specification on 09/06/2005 has been considered.

Allowable Subject Matter

2. Claims 1-4 are allowed.
3. The following is an examiner's statement of reasons for allowance: The prior art fails to show a digital-to-analog converter (DAC) coupled to receive at least one digital input signal and a clock signal, comprising: a latch for latching the first and second code sequence signal depending upon the clock signal and for providing the first and second synchronous control signal, wherein the latch includes a plurality of transistors; and wherein the latch reduces the drain to source voltage variation of the plurality of output current source transistors and reduces the coupling of unwanted injection of the digital input signal and the clock signal by maintaining the plurality of transistors of the latch in the off position during code transitions without compromising the DAC update speed as called for in claim 1. Therefore, claims 1-4 are presently allowed.

Conclusion

4. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
